## WHO AM I?

Python developer, with knowledge of APIs, having 5 years of experience, mainly with Django for 4 years. Regular knowledge in Angular, with Bootstrap and Tailwind. I helped companies to build web applications for e-commerce with more than 1 million users, knowledge of ERP functionalities and software for biotechnology. I have good adaptability in knowledge of business rules.

I have great knowledge in databases, having 1 year of experience in data migrations between different databases (Postgresql, MySQL, Firebird, etc.). In all the applications I applied agile methodologies such as Scrum, Kanban and Poker Planning.

I am a Bachelor of Science in Computer Science from Federal University and 6 postgraduate degrees (Management, UX/UI, Software Engineer, Cloud Projects, LGPD and Educational Methodologies) and an accounting technician.
